Summary

Software Engineer with production experience at Tata Motors and enterprise delivery at Capita. Built Python/Flask services and dashboards used by **150+ daily users at 99.9% uptime** and cut manual allocation time by **40%**. Works across Python/FastAPI, C#/.NET, React, SQL, and Azure, with a focus on reliable backend systems and clean, maintainable code.

Experience

Software Product Developer Apprentice — **May 2026 – Nov 2026**
Capita (via Ventura India Pvt. Ltd.) — *Pune, India*

- Build and debug **C#/.NET** middleware that processes XML input and generates JSON, TXT, DAT, CSV, PDF, and XML outputs in an event-driven workflow.
- Use **Azure** Service Bus, Blob Storage, Functions, Azure SQL, Cosmos DB, and Application Insights for messaging, persistence, and monitoring.
- Implement error handling, logging, and retry logic to keep file processing reliable and easy to troubleshoot.
- Contributed to an AI-assisted non-functional testing initiative in **Python** using LLMs (agent-based workflows, testing dashboard).
- Completed training in SDLC/SSDLC, clean code, Git, FastAPI, and React; earned **Microsoft PL-400** (Power Apps, Power Automate, Logic Apps).

Python Backend Developer & Full Stack Intern — **Dec 2024 – Jun 2025**
Tata Motors — *Pune, India*

- Built an **AI-based task allocation system** (Python, Flask, PostgreSQL, Scikit-learn) integrated with ERP via REST APIs; cut manual allocation time by **40%** and improved supervisor efficiency by **25%**.
- Developed a real-time vehicle component tracker with **Flask REST APIs** and PostgreSQL, used by **150+ daily users** across departments at **99.9% uptime**.
- Built the **MASOP production dashboard** (JavaScript, Chart.js) with live REST feeds for manufacturing workflow monitoring.
- Worked in Agile sprints with Git/GitHub, code reviews, and branch management in a team of 5+ developers.

Projects

AI Resume Analyzer | *React, Node.js, Express, MongoDB, Gemini API, JWT* — GitHub

- Full-stack MERN app that uses the Gemini API to score resumes and return section-level improvement feedback.
- Added JWT authentication, protected API routes, and per-user analysis history in MongoDB.

Fitness Companion App | *React, Node.js, Express, MongoDB, ExerciseDB, YouTube APIs* — GitHub

- Search across **1,000+ exercises** by muscle group and equipment with video tutorials.
- Added server-side API caching and rate limiting, cutting page load time by **60%**.

Typing Speed Test Application | *React, Node.js, Express, MongoDB, REST APIs* — GitHub

- Real-time WPM/accuracy tracker with REST endpoints for scoring, a leaderboard, and per-user history.

Technical Skills

Languages: Python, C#, JavaScript, SQL, Java
Backend: FastAPI, Flask, .NET / ASP.NET, Node.js, Express.js, REST APIs
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Cloud & Data: Azure (Service Bus, Blob Storage, Functions, Azure SQL, Cosmos DB, Application Insights), PostgreSQL, SQL Server, MongoDB, MySQL
Tools & Practices: Git, GitHub, Docker, CI/CD, Postman, Azure DevOps, SDLC, Agile, OOP, DSA, Debugging

Education

B.Tech, Electronics & Telecommunication Engineering — **2021 – 2025**
Vishwakarma Institute of Information Technology (VIIT), Pune — *CGPA: 8.05 / 10*

Certifications

- Microsoft Certified: Power Platform Developer Associate (PL-400) | IBM Full Stack Software Developer (Coursera) | IBM DevOps & Software Engineering (Coursera)
- Data Structures & Algorithms (Infosys Springboard) | Scientific Computing with Python (freeCodeCamp)
